SEPTEMBER 2026

Transforming lives of communities through
Education, Environment and **Empowerment** initiatives

Overview

September was a month of meaningful engagement, strategic review, and grassroots impact for Cosmo Foundation. A key highlight was the on-ground leadership **visit by Mr. Ashok Jaipuria, Chairman, Cosmo Foundation and CMD, Cosmo First Ltd.**, who interacted with teachers, students, parents, community members, and farmers across Karjan to review and strengthen ongoing initiatives in education, environment, and women's empowerment.

The month sustained its educational momentum through **Teachers' Day** and **World Literacy Day** celebrations, alongside the continued **expansion of Cosmo English Tutor** through orientation programmes for rural learners. Capacity building remained a priority, with educators receiving **hands-on training in AI-powered digital content creation**, while 20 women entrepreneurs strengthened their **business capabilities** through practical training conducted **in collaboration with Karigaar Clinic**.

Environmental consciousness was woven into both learning and community engagement through **eco-friendly Ganesha-making activities, sustainable idol distribution, climate change awareness sessions, and tree plantation site visits**. These initiatives connected environmental responsibility with everyday community practices.

The month also saw continued efforts to strengthen digital learning through **Cosmo Digi Pathshala**, providing rural learners with accessible digital learning resources and opportunities for continued engagement beyond the classroom.

The month concluded with vibrant **Janmashtami celebrations** across Cosmo Gyan Vihar Kendras in Karjan and Gangapur, engaging 1,000+ students through traditional dress, Matki Phod, cultural activities, and creative expression. Together, these initiatives reflected Cosmo Foundation's continued commitment to creating sustainable, inclusive, and community-led pathways for learning and development.

Leadership on the Ground

From Classrooms to Communities: Leadership in Action

The visit by **Mr. Ashok Jaipuria, Founder Chairman & MD of Cosmo First Limited and Founder Chairman, Cosmo Foundation**, accompanied by **Mr. A. K. Jain, Director - Corporate Affairs, Cosmo First Limited & CSR Committee Member** and our mentor and well wisher **Ms. Anubha Tapuriah**, reflected Cosmo Foundation's approach of staying closely connected with the communities and interventions it serves. Across schools, community interactions and agricultural initiatives, the leadership team **engaged directly with students, educators, parents, local leaders and farmers** to understand progress, recognise grassroots efforts and identify opportunities to strengthen impact.

Building Strong Foundations for Every Child

At **Koliyad Shrestha Primary School, Village Koliyad**, the delegation visited the **Cosmo Gyan Vihar Kendra** and interacted with the school principal and Cosmo Foundation's **Balmitras**. The visit offered an opportunity to observe the Foundation's activity-based approach to foundational education, particularly for marginalised and migrant children. The delegation observed how **Foundational Literacy and Numeracy (FLN), activity-based learning, migrant-child inclusion, and early engagement through Balvatika** are being integrated into the learning process. By creating an engaging and supportive environment, the programme is helping children build confidence in their early learning journey and transition more effectively into **mainstream education**.

Building Digital Skills for Every Child

At **Shreeji Krupa Sarvajanic Vidyalaya, Village Koliyad**, the delegation reviewed Cosmo Foundation's **Digital Literacy Programme** and observed students applying their learning through practical digital tasks. Students demonstrated their capabilities across **AI tools, Google Flow, Canva, Microsoft Excel, PowerPoint and other Microsoft Office applications**, showcasing how digital learning is moving beyond basic computer familiarity towards practical, creative and future-oriented skills. The interaction highlighted the growing confidence of rural students in using technology as a tool for learning, creativity, problem-solving and future opportunities.

Leadership on the Ground

From Classrooms to Communities: Leadership in Action

Building Sustainable Schools

During the visit, the delegation reviewed the **sustainable infrastructure** created by Cosmo Foundation, including **waste-management dustbins, separate toilets for boys and girls, rainwater harvesting and solar power installations**. The infrastructure is creating impact beyond basic facilities—better sanitation is supporting higher enrolment and lower absenteeism among girls, while solar power is reducing electricity costs and enabling savings to be redirected towards education. Rainwater harvesting is supporting agriculture-based vocational training, water conservation and groundwater recharge, strengthening both learning and local resource sustainability.

From Grassroots to Growth: Stories of Transformation

The interactive **Open House and community dialogue** began with the **felicitation of delegates** by the President of Kelavni Vidhyamandal, Village Koliyad. The session brought together a diverse group of **School Management Committee members, school teachers, Cosmo teachers, parents, community members, students, former students, and participants of Cosmo Foundation's women empowerment programmes**. Former students and women beneficiaries openly **shared their journeys** and the ways Cosmo Foundation's **interventions had influenced their lives**. **Current students** shared how Cosmo Foundation's educational interventions are strengthening their foundational learning, digital skills, English learning and confidence. **Former students** spoke about their journeys from farm labour to diplomas and meaningful employment, supported by computer education and career guidance. **Women from Beautiful Creation** shared how the skills developed through Cosmo Foundation's programmes, in partnership with Karigaar Clinic, helped them strengthen and grow their businesses, building greater confidence, self-reliance and opportunity.

Leadership on the Ground

From Classrooms to Communities: Leadership in Action

From Grassroots to Growth: Stories of Transformation

“

I come from a humble family, and my father was a farmer. When I was studying, my family could not afford to support my further education. At that time, Cosmo Foundation brought the Digital Literacy Programme to our school—giving us our first opportunity to touch, explore and learn on a computer. I was also fortunate to win a computer through the Cosmo Computer Award.

That first experience with technology sparked something in me. I began learning photo and video editing, eventually started my own photography studio, and created a livelihood for myself. I later pursued my passion for DJ as well.

I once thought my future would be limited to farm labour. Today, I earn independently and live with greater confidence and dignity. Cosmo Foundation did not just teach me computer skills—it opened a door to a future I had never imagined.

– Dinesh Rathva, Chhota Udaipur, Founder Jay Mahabal Studio

Leadership on the Ground

From Classrooms to Communities: Leadership in Action

Chairman's Message | Nothing Is Impossible

“Our journey began with a small beginning—₹20 lakh in annual sales and a capacity of 600 tonnes. Today, Cosmo First has grown to a ₹4,500 crore organisation, with a capacity of 600 tonnes every single day. This journey has taught us one thing: nothing is impossible. Earning money is difficult, but spending it meaningfully is even more important. For us, spending means investing in people, communities, and opportunities that create lasting impact. When we started Cosmo Foundation 18 years ago, we began with one school and one village. Today, our educational programmes have reached more than 72,000 students. But we are only a part of this journey.

The real contribution comes from parents who choose to educate their children. Educating your children is the greatest investment you can make—not only in their future, but in the future of your community and our nation.

— Mr. Ashok Jaipuria, Founder Chairman & MD, Cosmo First Limited
Founder Chairman, Cosmo Foundation

Growing More Than Crops: Cultivating Resilient Livelihoods

The leadership engagement extended to Cosmo Foundation's **Agroforestry project** at village Choranda, where a **mango plantation established three years ago** is now growing alongside the aspirations of local farmers. The delegation interacted with **30+ farmers from nearby villages** and observed their crop maintenance and intercropping practices, supported through farmer training. The visit highlighted how climate-smart agriculture can **strengthen both farms and farmer's incomes**, while recognising the dedication of farmers embracing sustainable practices for a more resilient future.

Creating Markets, Creating Opportunities

The delegation also **visited the Beautiful Creation exhibition stall set up during the Family Day event at Cosmo First Limited's Karjan plant**, where rural women entrepreneurs showcased their handcrafted products. The stall created a valuable platform for these women to **present and sell their products directly to Cosmo First employees and their families**, opening a pathway to new customers and market opportunities. The delegates explored the diverse range of products and interacted with the women entrepreneurs, learning about their journeys, enterprises and aspirations. The initiative reflected Cosmo Foundation's approach to empowerment—connecting rural women's skills with real market opportunities and helping their enterprises move towards greater visibility and growth.

Education

From Local Facilitators to Changemakers: Celebrating the Spirit of Rural Educators

Teachers' Day became an occasion to celebrate the dedication, growth, and inspiring journeys of **50+ community-based teachers across Gujarat and Maharashtra**. These educators, who began as local facilitators, have grown into confident and skilled professionals, building their own identities as educators while creating meaningful change within the communities they serve. **As a token of appreciation, Ms. Yamini Kumar Jaipuria, Managing Trustee, Cosmo Foundation, offered gift vouchers to the teachers**, recognising their unwavering commitment to children and communities. The celebration also provided a heartfelt opportunity to hear their stories of learning, skilling, caring for their communities, building their own lives, and becoming changemakers.

Their Journey. Their Growth. Their Impact.

The Moment I Knew I Made a Difference

As part of its Teachers' Day celebrations, Cosmo Foundation launched the campaign **"The Moment I Knew I Made a Difference,"** inviting Cosmo teachers to reflect on the experiences that made them realise the deeper purpose of being an educator. Through their stories, teachers shared the moments when they witnessed a student gain confidence, overcome a challenge, discover a new possibility, or begin aspiring towards higher education and a brighter future. These reflections went beyond the classroom to reveal the personal meaning of teaching—the moments when a teacher's guidance became a source of confidence, opportunity, and hope for a young learner. Each story highlighted how the teaching profession has enabled Cosmo educators to build meaningful relationships with children, support their communities, and become catalysts for positive change. The campaign celebrated not only the teachers' contribution to students, but also **their own journey of growth and purpose as educators.** By giving teachers a platform to share the moments that shaped them, Cosmo Foundation recognised the everyday experiences through which community-based educators create lasting impact—one student, one classroom, and one community at a time.

THE TEACHER BEHIND THE CHANGE

"The Moment I Knew I Made a Difference"

Watching My Students Thrive Professionally Made Me Proud

Before I ever stood in front of a classroom, I set in one — as a student of a soulful master, Shri Nankulal Pathak, an English graduate of 1922, who gifted me the gift of perfect English. He was my foundation, and everything I have ever taught began with what he first gave me. Over the years, I have tried to pass that same gift forward, and today I see it living on in hundreds of students — as HR professionals, bank managers, engineers, and more, some even working right here in our own company's film plant. Watching them step into the professional world and thrive, carrying a piece of what I once gave them, I know that the English and communication skills I taught became a real bridge in their lives — turning classroom lessons into careers, confidence, and independence. And every time I see them succeed, I feel Shri Pathak's legacy continuing through me, and through me, into them. That is what makes me proudest to be a teacher — knowing that one soulful master's gift never really stayed with just one person; it became a chain, quietly changing lives of students.

Pravin Chauhan
Senior English Faculty & Associate Program Coordinator

Thank you, teachers, for shaping minds and transforming lives.

"The Moment I Knew I Made a Difference"

My Students' Progress Makes Me Proud to Be a Teacher

My students once struggled to make sense of English grammar, stumbling over rules that felt distant and confusing. With continuous guidance and practice, I watched that confusion slowly turn into understanding, until they could confidently form simple English sentences on their own. When they now come up to me and say, "What we learned from you has made grammar easier for us," it fills me with quiet pride. Seeing that shift — from fear of a subject to confidence in it — is what makes me proud to be an English teacher.

Sonal Vasava
English Trainee Teacher, Karjan

Thank you, teachers, for shaping minds and transforming lives.

"The Moment I Knew I Made a Difference"

Helping a Struggling Student Made Me Proud to Be a Teacher

One of my newly admitted 7th-grade students was going through an especially difficult time — her father was a cancer patient, and she had just joined a new school. When she first came to my computer class, she was withdrawn, anxious, and barely spoke. I decided to build a safe, encouraging space for her, guiding her through digital learning resources like the Cosmo English Tutor channel to help her find her voice in English. Slowly, I watched her change — she grew happier, more confident, and started smiling at class with excitement instead of fear, and her English communication improved significantly. Seeing her regain that light was one of the most meaningful moments of my teaching journey, and it taught me that compassionate mentorship can truly change a child's life.

Namira Khan
Computer Cum English Teacher,
Village: Walaj, Chhatrapati Sambhajinagar

Thank you, teachers, for shaping minds and transforming lives.

Celebrating Teachers' Day
5th September

" A newly enrolled 9th-grade student once looked at the computer in front of me and said, "Ma'am, mujhse nahi hoga (I can't do it)." I gave her extra support and patiently taught her the basics of MS Word, one small step at a time. When she typed and formatted her own name for the first time, something in her changed — she smiled and said, "Ma'am, ab mujhe computer se dar nahi lagta (I'm not afraid of computers anymore)." Today, she is a regular in the lab, and she even helps other new students find their own confidence. That experience reminded me that as a Computer Teacher, I am not just teaching MS Office — I am helping students overcome fear and believe they can learn technology.

– Yasmeen Zameer Sayyad, Computer Teacher, Village: Limbejalgoan, Chhatrapati Sambhajinagar

Education

Taking English Beyond the Classroom

Cosmo Foundation continued to expand access to practical English learning through **Cosmo English Tutor (CET)**, conducting orientation and follow-up sessions across **12 educational institutions** in Gujarat and Maharashtra, reaching **1,200+ students**. Led by Cosmo teachers, the interactive sessions introduced learners to structured CET modules through live demonstrations, helping them understand how digital learning resources can support regular classroom learning and independent practice.

The sessions also focused on the specific language-learning challenges faced by students **preparing for Class 10 and Class 12 Board Examinations**. Through practical demonstrations and direct engagement, students explored accessible ways to strengthen their English skills, while participating institutions gained greater familiarity with CET as a supplementary learning resource. By taking Cosmo English Tutor directly into schools and educational institutions, the initiative continues to make **quality English learning more accessible, practical, and technology-enabled for rural learners**—helping students build language confidence that can support both their academic journey and future opportunities.

Education

Strengthening Literacy, Shaping Futures

On **World Literacy Day**, Cosmo Foundation, Karjan, in partnership with **DIET Vadodara**, the **Deputy District Continuing Education Officer and Government B.Ed. College**, organised an engaging literacy awareness programme around the **New India Literacy Programme**. Bringing together **46 B.Ed. trainees and MHRM students from MSU Baroda**, the initiative used **street plays, poster-making, slogan writing** to explore digital and financial literacy. The programme highlighted literacy as a pathway to confidence, opportunity and meaningful participation in today's digital world. Cosmo English Tutor, Cosmo Foundation's free YouTube-based learning platform, was also introduced as an accessible resource for learners.

AWARENESS

Understanding why literacy matters in a changing world.

KNOWLEDGE

Building digital and financial literacy for everyday life.

EXPRESSION

Turning ideas into voices through creative activities.

ACTION

Taking learning beyond the classroom into communities.

Future Tech Skill Lab: Preparing Rural Students for Tomorrow

Cosmo Foundation, in **collaboration with ISIE-India and New High School, Village Dhoregaon**, launched the **Future Tech Skill Lab** to provide rural students with hands-on exposure to emerging technologies. The initiative has enrolled **130 Grade 9 students**, with **four hours of practical learning every week across two days**. Students explore **Electric Vehicle (EV) technology, solar energy, robotics, and drones**, moving beyond theoretical learning to develop practical skills, curiosity, and problem-solving abilities. By connecting classroom learning with emerging technologies and career possibilities, the lab is helping rural learners become future-ready and confident to explore evolving career pathways.

Education

Empowering Educators: Mastering AI for Next-Gen Content Creation

Cosmo Foundation conducted an interactive online training on **AI-powered video creation and digital content development**, engaging **35+ Cosmo teachers**. Facilitated by Mr. Harsh Zalavadiya, Communication & Partnership Manager, Cosmo Foundation, the session introduced practical applications of **ChatGPT, Canva, and Google Flow**. Through hands-on practice, teachers learned to transform written concepts into engaging visual content using a structured, scene-by-scene workflow and precise prompt engineering, incorporating characters, actions, camera angles, and expressions. The training equipped educators to create and edit **interactive visual learning materials**, enabling them to integrate emerging AI tools meaningfully into their classrooms and make learning more engaging for rural students.

“ This training on AI-powered video creation and digital content development opened our eyes to how seamlessly tools like ChatGPT and Canva can make complex classroom topics visually engaging. Learning precise prompt engineering empowers us to create dynamic educational content that brings our daily lessons to life for our students

– Ms. Pallavi Gavali, Computer Teacher,
Z. P. School, Village: Gavali Shivra

Cosmo Digishala: Connecting Communities to Digital Learning

As an online WhatsApp based learning initiative of Cosmo Foundation, **Cosmo Digi Pathshala** is expanding access to structured educational resources for rural and underserved learners. Over the past six months, the platform has engaged **1,028 learners through 269 tailored e-content resources**, including educational videos, practice materials, and self-learning tools. With **11,552 student responses**, learners are actively reinforcing concepts and building digital confidence at their own pace. By connecting technology with education, Cosmo Digi Pathshala encourages self-directed learning and extends opportunities beyond traditional classrooms, helping rural students strengthen their academic learning while developing greater confidence in using digital resources.

Ensuring Learning Beyond the Classroom

Despite challenges such as limited access to smartphones and the internet, Balmitras Kalpna Patel at Cosmo Gyan Vihar Kendra, Kothiya, Karjan, have ensured children's continued engagement with Cosmo Digi Pathshala by using their own phones, guiding them through e-content, and supporting their participation in online learning groups. Through regular home visits, phone calls, and parental engagement, they have strengthened family involvement in children's education, with some parents now independently explaining e-content and submitting their children's responses

From Hesitation to Confidence: A Journey of Learning

Four months ago, Shruti Rokade, a second-grade student at Z.P.P.S. Jikthan, joined Cosmo Gyan Vihar Kendra feeling shy and struggling to recognise basic Swar (vowels) and write independently. Recognising her challenges, Balmitra Rutuja Sagar Zalke visited Shruti's home and counselled her family on the importance of regular attendance and practice. With her family's support, Shruti began attending the class every morning at 8:00 AM.

Through consistent practice, home assignments, and continuous encouragement, she gradually built her foundational literacy skills and confidence. Today, Shruti can confidently read and write Swar, read complete words from the board, and actively answer questions in class. Her journey demonstrates how consistent learning, family engagement, and individual attention can unlock a child's potential and build a strong foundation for lifelong learning.

Environment

Eco-Friendly Ganesh-Making Workshop: Celebrating with Sustainability

Cosmo Foundation promoted **sustainable celebrations** during **Ganesh Chaturthi** through a series of eco-friendly initiatives across its communities. In **collaboration with Bal Bhavan Vadodara and GACL Foundation**, along with **eco-friendly Ganesha-making workshops** led by Cosmo Foundation's Balmitras across Karjan and Chhatrapati Sambhajinagar, a total of **72 students participated** in hands-on clay idol-making and learned about environmentally responsible celebrations. 17 students formally awarded certificates by Bal Bhavan Vadodara and the GACL Foundation. Extending the initiative beyond learning, Cosmo Foundation also **donated 55 eco-friendly Ganesha idols** to **schools and communities** in Chhatrapati Sambhajinagar, making sustainable celebrations more accessible.

Environment

Eco-Friendly Ganesh-Making Workshop: Celebrating with Sustainability

Protect the Ozone, Protect Our Future

Cosmo Foundation marked World Ozone Day through a creative **poster-making activity** on the theme **“Save Earth, Save Life,”** engaging **35 students** in exploring environmental preservation, natural calamities and the importance of the ozone layer in maintaining ecological balance. The activity used art as a medium to translate a global environmental concern into an accessible learning experience, encouraging young learners to reflect on their role in protecting the planet.

Empowerment

From Learning to Action: Building Stronger Women-Led Enterprises

Cosmo Foundation, in **collaboration with Karigaar Clinic**, conducted an intensive **two-day, 16-hour hands-on business wellness training programme** to help rural women entrepreneurs strengthen and grow their enterprises. Bringing together **20 women entrepreneurs**, the practical sessions focused on turning everyday business challenges into actionable strategies through guided exercises, demonstrations, and real-time application.

Participants worked hands-on with key aspects of business management, including product costing, identifying hidden expenses, market research, customer profiling, and the Four Ps of Marketing. The training also moved beyond business theory into practical digital application, with participants using their own mobile phones to learn professional product photography, catalogue creation, seasonal product planning, and the creation of social media videos and reels. By learning, practising, and applying these skills during the sessions, the entrepreneurs gained greater confidence to manage their businesses more systematically and explore new markets both offline and online. The programme transformed business learning into practical action—equipping women not just with knowledge, but with the confidence and tools to apply it to their own enterprises.

From Business Knowledge to Practical Skills

KNOW YOUR NUMBERS

Product costing & hidden expenses

KNOW YOUR MARKET

Market research & customer profiling

PRESENT YOUR PRODUCT

Product photography & catalogue creation

REACH MORE CUSTOMERS

Social media videos, reels & digital marketing

I participated in the second offline training programme of the Women Entrepreneurship Business Wellness Programme, where I learned how to use AI tools, content planning, and content calendars to strengthen my social media presence. Earlier, we created only one reel a month, often using similar concepts. The training helped me understand how to create different content ideas for the same product, use a mix of posts and reels, and leverage tools like ChatGPT and Gemini for content creation. I am now confident about creating more consistent and engaging content to grow our Instagram and Facebook presence.

– Khusbu Patel, Women Entrepreneur, Shree Kiya

Event

Janmashtami

Cosmo Foundation celebrated **Janmashtami** across its Cosmo Gyan Vihar Kendras (CGVK) in the Gangapur and Karjan blocks, engaging **1,000+ students** in vibrant cultural and creative activities. Children participated in **Matki Phod, traditional dress (Veshbhusa), cultural performances, and thematic poster-making**, creating a joyful space to express their creativity and celebrate Indian traditions. The celebrations encouraged teamwork, confidence, and participation while helping young learners connect with cultural values. Through such joyful experiences, Cosmo Foundation continues to nurture holistic development, creativity, and community spirit among rural children.
